Skills

       Frontend : HTML, CSS, Javascript, React js, Tailwindcss, MaterialUI

       Backend: Nodejs, Expressjs, Mongodb

EXPERIENCE

Profile: GrapheneAI   **August 2022 -**

- Currently working as Software Test Engineer (QC) in Graphene AI Bengaluru from August 2022

Education

BE- Electronics and Communication Engineering,
CGPA = 7.42
Dayananda Sagar College of Engineering, Bengaluru (2022)

PROJECTS

1) Sticky notes   **March 2023- March 2023**

• Created an intuitive user interface design using HTML, CSS and React.js.
• Integrated local storage for data persistence, ensuring notes are saved between sessions.
• Added color-coding and categorization features for easy note organization.
• Github:- https://github.com/vijay5599/sticky-notes

2) Weather App   **April 2023- April 2023**

• Created a user-friendly and responsive interface with HTML and CSS.
• Utilized JavaScript to handle user input and make third-party weather API requests to fetch weather data
• Github:- https://github.com/vijay5599/Weather-App.git

3) Ecommerce website   **May 2023- June 2023**

• Designed, developed, and launched a modern E-commerce website using the MERN (MongoDB, Express.js, React, Node.js) stack, ensuring a seamless user experience.
• Implemented a product management system within the admin panel, allowing for easy addition, editing, and deletion of products
• Github:- https://github.com/vijay5599/MERN-ecommerce-Frontend.git
• Github:- https://github.com/vijay5599/MERN-ecommerce-backend.git
